Wanted!

Student assistant for the development and maintenance of a literature database

The Leibniz Institute for Baltic Sea Research Warnemünde, Working Group Trace Gases of the Chemistry Section under the framework of the ASMASYS project (<https://asmasys.cdrmare.de/en/>) is looking for a student assistant to support the development and maintenance of a literature database as soon as possible. A longer-term employment with up to 40h per month until the end of the project at the end of July 2024 is planned.

Tasks

- Research of new and relevant scientific literature in the field of "Carbon Dioxide Removal (CDR)".
- Maintenance and optimization of the literature database in cooperation with the programmers
- Support of the scientific secretariat in the scientific project ASMASYS <https://asmasys.cdrmare.de/en/>, e.g. in the organization of events.
- Further tasks can be added in case of interest

Desirable requirements

- Good English skills
- Experience in literature search in common scientific online portals such as Science Direct, Google Scholar, Web of Science, carbondioxide-removal.eu
- Ability to work self-organized and independent

We offer

- Support and training by two contact persons
- Insights into work processes and tasks of the AG Spurengase and the CDRmare
- Project ASMASYS
- Networking in the Leibniz Institute for Baltic Sea Research Warnemünde

In case of interest please contact Dr. Wanda Holzhüter:
