

Programme of the AMBER annual meeting

9:00 Opening and actual information (Joachim Dippner)

**9:15 Reports from the working groups
(contributions from all participants; please see details below)**

11:00 Coffee

11:30 Discussion on common publications

12:00 Discussion on future experiments

12:30 Discussion on modelling activities

13:00 Lunch

14:00 Tom Schumacher: The capacity of the European Union to solve the problem of Baltic Sea eutrophication. (University Kiel, invited presentation)

Discussion

14:45 Hannah Brocke: Translation: Science into policy

Discussion

15:30 Coffee

16:00 Discussion “How to come from science to policy?” What are the common “products”? How can we communicate and disseminate these “products”?

17:00 Discussion “The future: AMBER 2 ?”

18:00 Miscellaneous

19:00 Dinner

Details for the reports from the working groups

Not everybody attended the AMBER Kickoff meeting last year and not everybody participated on the Vilnius BONUS Conference. That means that a detailed knowledge of ongoing AMBER activities is on different levels. Therefore, the deeper meaning of the reports from the working groups is to bring all participants to the same level of information which is necessary for the later discussions.

My suggestion is: All participants especially the Ph.D. students should give a short presentation of five minutes (3-5 slides) on ongoing work. In this presentation the following topics should be addressed:

- What have we reached so far (including major problems, if there are any)?
- What will be the next steps?
- Which peer reviewed publications are planned?
- Identification of common publications with other working groups?
- Identification of potential “products” for dissemination?

If you provide us your presentations before you arrive, we can put it on the computer system and we are winning time.

Please check the following point before you come to Warnemünde: Go to the AMBER homepage (<http://www-io-warnemuende.de/amber.html>) and check for completeness concerning peer reviewed publications, oral and poster presentations, cruise and sampling reports, metadata base, etc. If you find aspects in which the homepage is not up-to-date, please send the necessary information to Karin or me.

Karin Junker (Karin.junker@io-warnemuende.de)
