

## Class Information: Marine Turbulence (SS 2020)

- The class on *Marine Turbulence* will be given by Priv. Doz. Dr. Lars Umlauf *online* on Mondays from 16:00 to 18:00. The lecture series will start on 20 April. In view of the special situation, the class will be offered via an online meeting software this semester.
- Exercise sessions will take place approximately every second week on Mondays from 15:00 to 16:00 (also via an online meeting tool). Dr. Peter Holtermann will supervise the sessions.
- Assignment sheets will be made available for download from the website indicated below. The completed assignments have to be returned *online as a single PDF* at the due date indicated on the assignment sheet. Please mark your name on each of the assignment sheets.
- Zero points will be credited for assignments returned after the deadline.
- Problems can be discussed online during the exercise sessions. We strongly encourage students to contact the session instructor by email (address below) if assistance is needed between the exercise sessions.
- At the end of the lecture period an oral exam has to be passed. Admission to this exam requires at least 50% of the maximum points for the assignments.
- Class material (notes, assignments, data) will be made available on:  
<http://www.io-warnemuende.de/lars-umlaufl-teaching.html>

Enjoy the lecture, and contact us anytime if problems pop up!
